

# SensoTASTE Software for Smart Sensory Tests

Fact Sheet 1

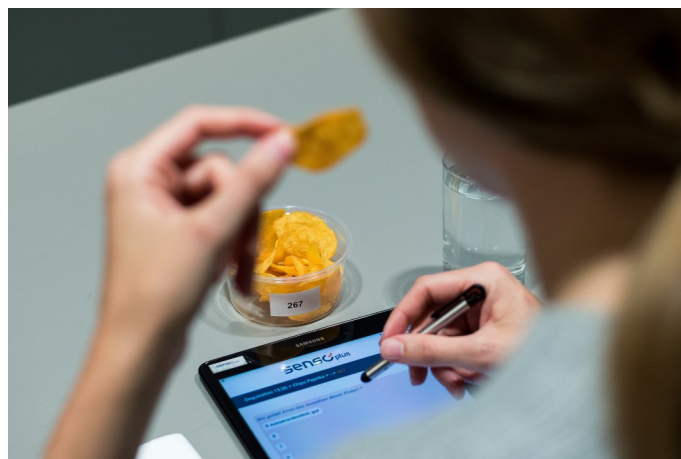

Topic: Digitalisation of Sensory Evaluation

## SensoTASTE Services

- Web-based applications with offline function
- Free choice of device: no software installation necessary
- Interfaces to ERP and LIMS systems can be implemented
- Modern and user-friendly programming
- Cloud solution or in-house installation possible
- Customizing of functions according to customer requirements
- Extendable to QM software
- Support in German / English language

## Most Important Features

- Digital planning, administration, evaluation and statistical analysis of sensory tests.
- Pre-installed test methods: Release process, triangle test, A-not-A test, ranking test, acceptance test, descriptive profiling, odour and taste recognition tests for panel training, storage or best-before tests
- New test design programmable by customers
- Fully automated daily release process - active recording only necessary in case of defect, visualisation with traffic light system
- Evaluation according to DLG-5-Point-Assessment-Scheme possible
- User-based display of functions and questionnaire elements
- Database with integrated product information
- Action management with photo function and email reminder function
- Integration of laboratory analysis values

## Advantages for Your Company

- All sensory tests of quality assurance and product development can be mapped with a single software package
- Online sensory evaluations by internal or external panel possible
- Automated and immediate evaluation and reporting
- Systematic comparability, analysis and documentation
- Transparent decisions with integrated action log
- Sales growth through faster innovation cycles and improved quality
